

Most Popular Cisco CCNA Training Videos on YouTube are from Palaestra Training

Cisco's CCNA certification is one of the most popular certifications in the IT industry for good reason. It translates to higher visibility, higher salaries and increased job opportunities. Palaestra Training's Cisco CCNA Training Videos provides expert, real-world computer based training instruction. IT Certification Training in a Computer Based Training format that enables a person to get trained and certified quickly; for a fraction of the cost of traditional classroom instruction.

Medford, NJ ([PRWEB](#)) November 3, 2008 -- Palaestra Training creates Computer Based Training (CBT) videos for the Information Technology industry. Palaestra Training's [Cisco CCNA Training Videos](#) are one of their best selling video training series and by far the most popular Cisco CCNA Training videos on YouTube. "It's impressive to see how the YouTube community will let you know rather quickly how well your products rank compared to the competition - and we're ranking #1", said Palaestra Training's president, Christopher Rees.

With the state of the local and global economy, people are looking for ways to insulate themselves from this uncertainty. They want a way to get expert training quickly and affordably and improve their existing skills or learn new ones. They want training that prepares them for the real world, as well as the certification exams. Palaestra Training's Computer Based Training does that and more, allowing people to get expert-training they can watch anytime, anywhere and learn at their own pace, from some of the best instructors in the world.

Companies are also feeling the pressure to train people more cost effectively. They are looking for ways to cross-train or re-train their staff without expensive classroom instruction, travel expenses or time away from work. Again, Palaestra Training's [IT Certification and Training Videos](#) offers a solution that enables companies to give their staff expert instruction for a fraction of the cost of traditional classroom training. "Companies of any size can be assured their getting world-class training they can view right on their own network. Training doesn't have to mean expensive travel, time away from work and the hope you'll get a good instructor. Palaestra Training guarantees its training and offers a cost-effective way to train employees at work, at home or while on the road", said Palaestra Training's CEO, David Smith.

The Cisco CCNA Training Video series covers all the information a student needs to pass the Cisco CCNA 640-802 exam. The training can also be used to prepare for the two smaller CCNA Exams (640-822 - ICND1 and 640-816 - ICND2).

Palaestra Training's Cisco CCNA training video series is taught by expert instructor Jason Emerson. Jason is a professional information technologist who works in the field in addition to be a great instructor. His in-depth knowledge of Cisco products is a result of actually working with the technology on a daily basis, solving real-world networking problems. Jason is a well-rounded trainer with over a dozen certifications in Microsoft, Cisco and CompTIA technologies. "Jason's ability to teach complex information in a way that everyone can understand is an amazing gift. Not only can he make difficult technical concepts easy to understand, he also makes learning fun with his relaxed, conversational style", said Palaestra Training president, Christopher Rees.

As a company, Palaestra Training provides its customers with an amazing product at a very affordable price. "We are one of the lowest priced training products on the market, simply because we focus on giving customers what they want - Outstanding Training. Other companies add in things the customer doesn't want or need; things that add to the price but not to the value. By focusing on creating the best content possible, without the pricey add-ins, we're able to make world-class training affordable to everyone", said Palaestra Training's President, Christopher Rees.

Based in Medford, NJ Palaestra Training is a privately-held IT Certification and Training Video software firm. It offers instructor-led computer based training videos for various Microsoft, Cisco and CompTIA technologies, and also has a comprehensive training series on Internet Safety designed especially for parents.
